Experience & Education

x5.io / BotBiz

Leading frontend developer
2022-2023, 1 year and 1 month

Freelance

Dozens of projects since 2021
2 long-term clients (over 100 часов), worked with Joom.com labs

Basic General School Education

Lyceum of Information Technologies, Samara city
2012-2022

Secondary General School Education

2023

🔒 Bachelor's degree I'm just 18 y. o. :)

Hard Skills

React/Next.js

2,5 years of exp.

TypeScript

50+ projects

MongoDB

since 2021

Telegram API

MTProto & User API,
Bot API, Web apps

VK API

User API,
Bot API

React native

Expo, since 2022
2 projects in GP

136+ repositories on GitHub since 2020
18+ libraries for developers on npm

Proficient in working with Docker and D-
compose, containers, GHCR, self-hosted

npm registries, SQL and NoSQL databases

Developed admin panels and CRMs.
Worked with GraphQL, redux, and context.

Coding following the FSD methodology.

Deployed websites and microservices
using Nginx, Netlify, GitLab CI/CD.

Set up several high-traffic hidden onion
services in the darknet, including those
with WebSocket and CORS proxy.

I have a deep understanding of Telegram
Core API (client-side API). I've developed
over 30 bots with Bot API and User API.

Soft Skills, Hobbies

I work well both in team and as an individual, always communicating in a professional manner. I have a problem-solving mindset and I'm concentrating on seeking out edge cases. I've worked with Toggl and Atlassian's services.

I've been programming since I was six and tried my hand at gamedev, DevOps, business, AI, etc. I attended over six conferences in grades 7-9 at school. I love electric scooters, sports, and travelling with my boyfriend. I enjoy listening to mashups, pop, hip-hop 🎵

B1

Key projects and achievements

2023

Q3: Deployed Mastodon instance with modded backend;
donates with BTCPayServer, PostgreSQL queries

Q3: Launched E2EE file-sharing platform w/ WebCrypto.
I developed both frontend with symmetric file encryption
on AES-CBC and backend with S3-storage integration.
In addition, I launched an onion mirror in Darknet to this.

Q2: I developed three large websites w/ CloudPayments,
effectively boosting lead generation for employer.

Q1: Launched a fully automated aggregator of Telegram-
channels in form of a website with admin-panel on React
and integrated blog with my own Telegram parser.

2022 – 2021

Q3: Launched 2 VK chatbots for dating groups with Pay

Q1: Created an API wrapper with a scraper for an online
school; Developed an Excel parser for digitizing document
workflows in a private medical clinic in Kazakhstan.

Q4: Developed a Figma plugin for Joom.com designers.
