Work Experience

Business Estate Solutions, Remote — 10/2025—01/2026
Senior Full Stack Developer and Leading Frontend Developer
I designed a Telegram-integrated Svelte web app for a real estate agency that allows agents to manage contacts lists and share it internally, implemented contact book importing algorithm for both iPhone's iOS and Android and conversational questionnaire for contact import via bot chat

Unddit & RYO Coin, Remote — 01/2025—05/2025
Senior Frontend Developer
I created a web application on Svelte to view removed posts and comments on Reddit with sorting, filtering and viewing logic. Also created 4 landing pages and a detailed API reference website for cryptocurrency RYO Coin with code examples and CURL request command snippets

Nock Trade, British Virgin Islands, Remote — 05/2025—09/2025
Senior Full Stack Developer and Leading Frontend Developer
I designed a crypto exchange from scratch using SvelteKit working with BTCPayServer and RabbitMQ, created UI kit using shadcn/ui based on bits-ui, deployed micro services-based backend, custom Bitcoin signet and configured two testing environments for downtime updates

Freelance jobs — 01/2022—10/2024
Full Stack Developer, System Administrator, Frontend Developer, Backend developer
I implemented several micro frontends, analytics views based on 2M+ rows and GBs of raw data, charts for B2B, created a browser extension scraping pages, added AI to auto tag and translate content to 23 languages, which improved SEO, mentored junior developer, did code reviews

Moreof.me, Melbourne, Australia, Remote — 10/2024—01/2025
Senior Full Stack Developer and Leading Frontend Developer
I created a web application designed for phones, which could render videos on client-side, optimizing server workload, deployed scalable backend and configured micro-services with GCM, implemented real-time analytics, notifications system and client-side video compression

Joom, Designers team, Remote — 11/2021—12/2021
Developer on contract
I created a Figma plugin using Webpack and React that made it much easier for Joom's designers to create cross-platform UI design. Implemented OAuth that connects to team's self hosted components library, resulting in a 50% more efficient and faster layout designing

Hard Skills

React & Next.js
Using in production for 5+ years, have in-depth expertise with micro frontends and module federation

Svelte & SvelteKit
Strongly prefer it over React for better performance, ergonomics and DX, learned both Svelte 4 and 5

TailwindCSS
Using in frontend production for 3+ years, learned both v3 and v4, familiar with Tailwind Prettier plugins

Vite & Rollup
Implemented several Vite build-time and compile-time plugins for progressive enhancement in web

TypeScript
Always using it for JS development: Frontend, backend, SSR, database integrations, service workers

Drizzle ORM
Using in production for 2+ years, familiar Drizzle Studio and both Drizzle Queries and sql requests

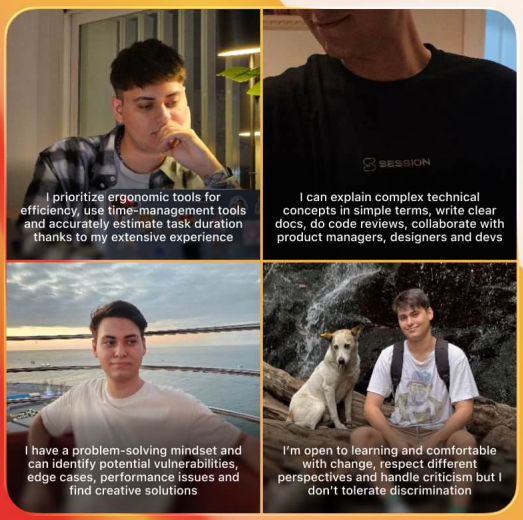

PostgreSQL
Implemented TimescaleDB extension, full text search in 33M+ rows, speed optimization using indexes

MongoDB
Applied text search indexes, row expiration, big data indexing with 5M+ rows and gigabytes of raw data

Docker, Podman
Using orchestration for my lufin open source project, also used GHCR and GCR for deployment

Swift & SwiftUI
Pivoted into mobile development in early 2025, released a couple of macOS and iOS apps, widgets

- I have over 200 public repositories with free, libre, open source software on my GitHub mirroring my self-hosted Git server & contributed 20+ packages to npm and JSR registries
- I aim to create accessible, privacy & progressive enhanced SEO modular frontend by writing semantic HTML markup, accessibility media queries and ensuring color contrast
- I can deploy scalable applications on any machine, tech stack and runtime: Serverless, Edge, Bun, Deno, Node.js, Docker, Google Artifact Registry, Google Kubernetes Engine
- I follow DRY & KISS principles, adhere to best practices and use linters and formatters to write consistent code and design maintainable applications for your business requirements

🎓 High School Equivalent
Opted for career advancement instead of pursuing higher education, independently mastered IT skills

💼 Work authorization
Authorized to work in Spain, have EU bank account

🏅 Honors & awards
ITMO CYS 04/21, "Clever" IT Hackathon (gold) 11/20, "Potential" (2nd) 12/21, ITMO CYS IX 04/20, ITMO Open Code (diploma) 04/19

✈️ Ready to relocate
Within Spain or North-Western Europe
